With Notebook 11.4, you don't actually need a code. Install version 11.4 of Notebook. If you download 14.1 it will work for 90 days, but then it will stop working without a code. When that happens you will either need to purchase a license or uninstall 14.1 and go back to version 11.4.

If you install Notebook 11.4 you have the option of installing a trial of other things like Smart Response, and Math tools. Often teachers will see that the trials on those extras are expiring soon and think that their entire software will stop working. Which of course is not the case, as just those pieces will stop working.

*Be advised, if your computer is old, the software, which is very robust, may slow it way down.*

*If there are issues that you cannot resolve - put a trouble ticket in.*
